## DESIGN.

Each project is designed to reflect the vision and needs of our clients. It's about creating unique spaces. A project lives and dies during the design phase. It's our attention to detail and our understanding of construction that allows us to design something that looks great and functions too. As your consultant we will consider each element of your project. We will ensure it fulfills your requirements and can be built on time and within budget. It's our understanding of the market, how projects work and design, that sets us apart from the crowd.

## BUILD.

We are a complete interior general contractor and have a talented execution team in house to ensure our projects are executed to the highest standards. We take care of everything involved in the construction process including; electro mechanical, plumbing, AC, partitioning, ceiling, flooring, lighting, joinery, glass, finishes and furniture. Our projects team will manage all aspects of the project from gaining authority approvals, procurement, cost management, coordinating with contractors on site, dealing with site issues and ultimately, handover.
